-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

## DETAILED ACTION

### *Election/Restrictions*

Applicant's election with traverse of Group I, claims 1-5, in the reply filed on 08/11/2005 is acknowledged. The traversal is on the ground(s) that the claims are closely related and would not provide an undue burden on the Examiner. This is not found persuasive because these inventions are distinct and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

The requirement is still deemed proper and is therefore made FINAL.

Claims 6-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 08/11/2005.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim\*\*\* rejected under 35 U.S.C. 102(b) as being anticipated by Shimizu [US 4,458,230].

Claim 1, Shimizu discloses a solenoid switch comprising: a frame [2]; a coil unit [4] to selectively generate a magnetic field; and a moving part [5] comprising: a first

surface selectively in contact with the frame based upon the magnetic field of the coil unit, a second surface not in contact with the frame, and an anti-corrosion material coating the first and second surfaces, a thickness of the anti-corrosion material being thinner on the first surface than on the second surface [col. 2 lines 44-51].

Claim 2, Shimizu discloses the solenoid switch of claim 1, wherein the frame comprises: a first surface selectively in contact with the first surface of the moving part based upon the magnetic field of the coil unit; a second surface not in contact with the moving part; and an anti-corrosion material coating the first and second surfaces of the frame, wherein a thickness of the anti-corrosion material of the frame is thinner on the first surface of the frame than on the second surface of the frame [col. 2 lines 44-51].

### ***Allowable Subject Matter***

Claims 3--5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***
